Blood Pressure Categories

Category	Systolic/ Diastolic
Lowrisk	<u>120</u> 80
Medium risk	<u>121-134</u> 80-84
High risk	<u>135+</u> 85+

If you have **diabetes**, your blood pressure should be less than 130/80. If you are **over 80 years of age**, talk to your healthcare provider about the right blood pressure level for you.

How to measure your blood pressure accurately:

 Do not exercise, smoke or drink coffee, tea or cola (any drink containing caffeine) in the 30 minutes before

- Do not measure your blood pressure when you are upset or in pain
- Empty your bladder or bowel
- Sit quietly with your back against a firm surface, your feet on the floor and your arm supported on a table at heart level for 5 minutes before and during measurement
- Use the same arm each time
- Wrap the cuff snugly around your bare upper arm, 3 cm above fold of elbow, at heart level
- Do not talk during the measurement

(

 Show your healthcare provider your blood pressure readings, especially if your readings are higher than 140/90

 \bigoplus

Note: Ideally, you should take your blood pressure twice a day – morning and evening – and write it down.

Date	Time		
DD/MM/YY	AM/PM	Systolic	Diastolic
5 / 12 / 20	AM	123	82
